EUROSASH

When it comes to choosing windows for your home EUROSASH PVC-U Vertical Sliding Sash brings you charm that matches performance.

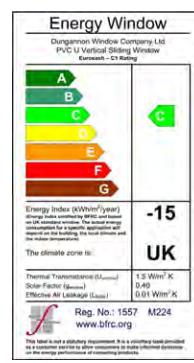

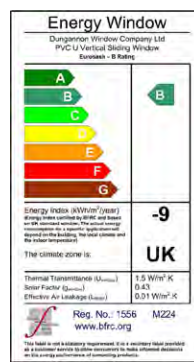

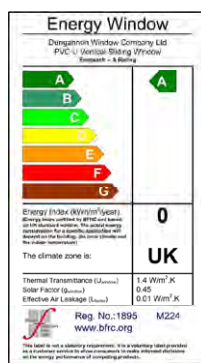

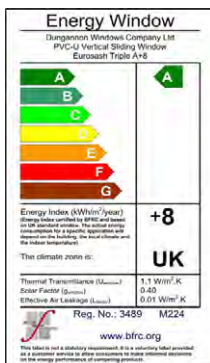

A market leader in it's field EUROSASH product has been fulfilling the needs of homeowners since 1995.

The windows are specifically designed to suit your requirements and provide all the character of wooden sash windows without any of the maintenance issues.

Don't just think sash, think EUROSASH

EUROSASH 'A' is Ireland's 1st 'A' Rated PVC-U Sash Window

Why choose an Energy Efficient EUROSASH Window?

EUROSASH windows help to contain and conserve heat within your home keeping out wind and rain yet allowing natural 'free' energy to heat your home.

Energy Efficient EUROSASH windows will;

- Save you money
- Reduce your carbon footprint
- Help to reduce condensation

EUROSASH its as easy as A, B, C

FLY SCREENS

EUROSASH has an optional fly screen that slides up and down with the top sash. Completely hidden in the top of the outer frame this fly screen is a new innovate addition to the **EUROSASH** window.

The new screen offers protection from flies, wasps, mosquitoes and moths and is great for kitchen windows, bathroom windows, farm houses, homes near lakes / ponds or wooded areas, basically anywhere there are insects.

BS7950 ENHANCED SECURITY HARDWARE

EUROSASH SECURE was the 1st Sliding Sash Window in Ireland to pass the vigorous **BS7950 (revision 3 2007)** test for Enhanced Security.

The test is about the durability, strength and security of the hardware which is fitted to the **EUROSASH** sliding sash window. The hardware takes security to a new level and upgrades the **EUROSASH** window to provide enhanced security against unauthorized forced entry.

EUROSASH secure **BS7950** windows include:

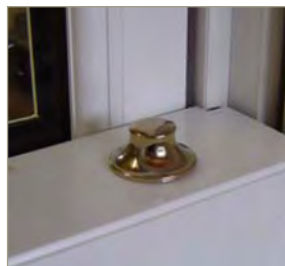

- Heavy Duty Cam locks and Keeps
- Steel Reinforcement Pins
- Deadlocking Tilt Latch Buttons
- Available in all Colours
- Durable Nylon Polymer Sash Blocks

Fully Integrated Fly Screen

Gold Ring Pull

Gold Sash Tilt Latch Knob

Gold Sash Lift

Gold Sash Lock & Keeper

Optional Run Through Horn

Releasable Child Restrictor

Authentic Raised Astragal Bar

WHERE IS THE WOOLPILE?

The woolpile (brush seal or dust catcher) is an important part of the sealing system for sash windows as it increases the window's resistance to draughts and water egress.

As the woolpile above the inside sash and the woolpile below the outside sash do not help with the sealing system, it has been replaced with a matching PVC-U insert strip. Used as standard in all our windows, it clearly improves the visual appearance of the window and leaves the frame easier to clean.

CREAM ON CREAM

A standard for eurosash our Cream Grained Vertical Sliding Sash window is now available on a cream base. The eurosash window was originally foiled on a white base resulting in a 'little bit of white' being visible inside the balance chamber of the outer frame.

House with a Full Raised Astragal Bar Grid (Georgian Style) Windows

EXCLUSIVE TO EUROSASH

The new snap in 15mm drip trim is now available for underneath the cill section. The drip trim is designed to cover the upstand of your concrete cill and will also provide an additional seal to ensure water tightness.

This trim is available in all our colours White, Cream Grain, White Grain, Black Grain, Light Oak and Rosewood.

Face will match foil on cill section

EUROSASH BIFOLDS

Bi-folding doors are a modern and stylish alternative to sliding patio and french doors and will give your home a real 'wow' factor. These elegant concertina doors are an innovative way to enlarge the feel of any room and to connect the inside with the outside. They can be used in a variety of locations such as extensions, conservatories or even as internal room dividers.

STANDARD FEATURES AT A GLANCE

- Doors are manufactured using robust 70mm reinforced profiles
- Doors fold back against each other to maximise space
- Inward & outward opening options available
- Two to seven panel bi-folds for up to six metre openings
- Rigorous in-house weather testing carried out to PAS23
- A wide range of colour options including cream foil on a cream base
- Smoother bottom roller glide system for easy operation
- Thermally efficient with low energy double glazing
- High security Euro cylinders and captive hook locks with deadbolts
- Low maintenance PVC-U with ovolo detail to frame and sashes
